## & PRODUCT SYSTEMS MANUFACTURER

## Sustainable Packaging & Product Systems for **Global Markets**

“Ekoroll develops smart, eco-integrated product systems that combine sustainability, functionality, and modern design. From food packaging and molded fiber systems to natural lifestyle products and biodegradable accessories, Ekoroll delivers scalable eco-solutions for global markets.”

### As Featured In

Independent industry coverage of our move beyond plastic.

## EKOROLL AT A GLANCE

Ekoroll is a Türkiye-based manufacturer specializing in sustainable packaging and eco-integrated product systems for retail and food service sectors.

With export-oriented production infrastructure and scalable manufacturing capacity, we supply distributors, wholesalers, and private label brands across Europe and the Middle East. Our portfolio includes molded fiber food containers, eco packaging systems, smart retail packaging, biodegradable accessories, and natural product lines, developed to meet international compliance and commercial performance standards.

From material sourcing to finished product delivery, Ekoroll operates with industrial efficiency, quality control, and long-term partnership focus.

“ True innovation does not always come from improving individual components. Sometimes it begins by simplifying the entire system. ”

## The Packaging Industry Is Changing

Packaging today faces more pressure than ever, from sustainability targets and tightening regulation to supply chain cost and rising customer expectations. These pressures rarely arrive one at a time. A single packaging decision can touch sustainability targets, regulatory compliance, supply chain cost and the customer-facing experience simultaneously, and a trade-off made in one area often resurfaces as a problem in another.

Meeting these expectations requires more than changing one material for another. It requires better packaging systems: products designed around real foodservice operations, supply chain requirements, end-user behavior and long-term commercial viability.

Four factors in particular separate packaging that performs from packaging that only looks good on a spec sheet:

### Beyond Material Substitution

Replacing plastic is only one part of the challenge. Packaging must still perform, protect, ship efficiently and support the brand experience.

### Operational Fit

Packaging should simplify service, reduce handling and support the real workflow of restaurants, chains, distributors and hospitality operators.

### Commercial Reality

Sustainable solutions must be scalable, manufacturable and financially practical for the markets they serve.

### Regulatory Awareness

Food-contact compliance, documentation and material selection are considered early in the development process.

## OUR MISSION

To develop sustainable and functional product systems that meet modern retail and food service standards while reducing environmental impact. We focus on responsible materials, efficient production, and scalable solutions designed for international markets.

## OUR VISION

To expand globally as a reliable eco-solutions manufacturer, supporting distributors and brand owners with innovative, compliant, and commercially viable alternatives to conventional disposable products.

## OUR CORE PRINCIPLES

### SUSTAINABILITY

Material responsibility and lifecycle awareness guide our product development process.

### INNOVATION

We integrate material science and practical design to improve performance and reduce waste.

### TRANSPARENCY

Clear sourcing, production consistency, and honest communication with partners.

### COLLABORATION

Long-term partnerships with distributors, private label brands, and international buyers.

### DESIGN EFFICIENCY

Functionality and structural reliability are as important as environmental impact.

## TR HAKKIMIZDA

Ekoroll, perakende ve gıda sektörüne yönelik sürdürülebilir ambalaj ve çevre dostu ürün sistemleri geliştiren Türkiye merkezli bir üreticidir. İhracat odaklı, ölçeklenebilir ve ticari çözümler sunar.

## MİSYONUMUZ

Çevresel etkiyi azaltırken modern perakende standartlarına uygun sürdürülebilir ürün sistemleri geliştirmek.

## VİZYONUMUZ

Avrupa ve Orta Doğu pazarlarında güvenilir bir sürdürülebilir üretici olmak.

# EKOROLL LID-FREE CUP™ SYSTEM

## “ DESIGNED TO REDUCE SEPARATE PLASTIC LID HANDLING ”

The Ekoroll Lid-Free Cup System is an integrated paper cup concept designed to simplify beverage service and reduce reliance on separate plastic lids.

Instead of using a separate lid, the cup structure includes an integrated folding paper closure. This creates a more streamlined beverage service experience for selected hot and cold drink applications.

The system is especially relevant for environments where speed, handling, storage, waste reduction and service flow matter. ”

## KEY ADVANTAGES

**Integrated Paper Closure:** The closure is built into the cup structure.

**No Separate Lid Handling:** Helps reduce the need to stock, handle and serve separate plastic lids.

**Operational Simplicity:** Designed to support faster preparation and cleaner service flow.

**Differentiated Customer Experience:** Creates a distinctive packaging format for modern beverage service.

**Suitable Applications:** Cafés, hospitality, airline service, events, takeaway, catering and high-volume beverage operations.

# EKOROLL DISPOSABLE PAPER ASHTRAY™

Paper-Based Ashtray with  
Water-Activated Core

## “ DESIGNED TO REDUCE OUTDOOR ASHTRAY CLEANING ”

The Ekoroll Disposable Paper Ashtray is a paper-based, single-use ashtray designed for high-traffic hospitality, events and outdoor service areas.

Its absorbent core activates with water to help extinguish cigarette butts and contain ash residue, supporting cleaner and more controlled smoking areas. For distributors and hospitality operators, the product is lightweight, stackable and suitable for custom branding and bulk deployment.

## KEY ADVANTAGES

**Water-Activated Core:** Activates with water to form a stable absorbent gel, helping contain cigarette butts, ash and residue.

**Hygienic Single-Use Operation:** Removes washing, collection and redistribution of reusable ashtrays in busy outdoor areas.

**Bulk Distribution Ready:** Lightweight, stackable and packed for high-volume supply.

**Custom Branding:** Logo placement and graphic customization help turn a functional item into a visible brand touchpoint.

**Suitable Applications:** Cafés, hotels, bars, beach clubs, festivals, outdoor events and designated smoking areas.

90 mm width — 4.9g ±0.1 — 50 PCS / Bag — 1000 PCS / Carton

## PRODUCT PORTFOLIO

### FOOD SERVICE SOLUTIONS GIDA SERVİS ÇÖZÜMLERİ

Designed for modern food service environments, combining operational performance, structural durability, and responsible material innovation for high-demand applications.

Product Range Includes:

- Molded Fiber Food Containers
- Bagasse Containers
- Kraft Takeaway Boxes
- Corn-Based Food Applications
- Custom Food Packaging Solutions

Available in multiple sizes, structures, and branding options.

**Engineered for Scale. Ready for Global Service.**

# BAGASSE RANGE

ŞEKER KAMIŞI LİFİ SERİSİ

## WHY BAGASSE PACKAGING?

- Made from sugarcane fiber
- Suitable for hot and cold food applications
- Strong and lightweight
- Alternative to conventional plastic foam packaging
- Practical for takeaway, delivery and catering

Compostability and food-contact documentation can be provided depending on the final product specification and production route.

# PRODUCT RANGE OVERVIEW

Rigid  
Structure

Microwave &  
Freezer Safe

Leak  
Resistant

Oil & Grease  
Resistant

Odor &  
Taste Neutral

## KEY BENEFITS

- Strong, rigid and lightweight fiber structure
- Suitable for both hot and cold food service
- Oil and moisture resistance (varies by product type)
- Leak-resistant and taste-neutral performance
- Microwave and freezer suitability
- Compostability documentation on project confirmation

## “ BAGASSE FOOD CONTAINERS

Bagasse is a renewable, fiber-based material made from sugarcane residue, a practical alternative to conventional plastic and tree-based disposable packaging. Ekoroll's bagasse containers are designed for foodservice, takeaway, delivery and catering applications where sustainability, strength and commercial performance matter.

Depending on the final product specification and local waste-management infrastructure, bagasse products can support compostable packaging strategies through suitable commercial composting systems.

Designed for hot and cold food applications, selected bagasse containers may be suitable for microwave reheating, freezer storage and short-term food holding, while maintaining reliable performance during service.

Their fiber-based structure provides rigidity and resistance to everyday handling, helping the container remain stable and presentable from preparation to consumption.

”

## BX-66-CL - 6 x 6" Hamburger Box

Detail Size (LWH): 153 x 153 x 50  
Carton size (mm): 600 x 330 x 330  
PCS Weight (g): 27  
PCS Per Carton: 500

Designed for burger, sandwich, takeaway meals, delivery menus and foodservice operations requiring rigid fiber-based packaging.

# PAPER PACKAGING RANGE

KAĞIT AMBALAJ SERİSİ

## PAPER-BASED PACKAGING FOR A CHANGING FOODSERVICE MARKET

Foodservice packaging is no longer just a disposable item. It has become part of the customer experience, operational workflow, brand presentation and sustainability strategy.

Ekoroll Packaging Solutions supports foodservice brands, distributors, hospitality operators, retailers and packaging partners with practical paper-based packaging systems designed for real commercial use.

Our portfolio includes integrated cup systems, paper cups, paper food containers, bowls, trays, lids, dessert packaging and custom packaging concepts developed for takeaway, delivery, catering, retail and high-volume service environments.

“ We help partners move from product idea to sample evaluation, technical review and scalable commercial supply. ”

## BEYOND MATERIAL SUBSTITUTION

Replacing plastic is only one part of the packaging challenge. A successful packaging solution must still perform, protect the food, support service efficiency, meet customer expectations and remain commercially practical.

Ekoroll focuses on packaging systems that balance sustainability with real operational performance.

Our paper-based packaging portfolio supports brands and operators looking for practical alternatives to conventional plastic-heavy formats while maintaining the usability required in foodservice, takeaway and retail environments.

## LID-FREE HOT CUP

Designed for Coffee, Tea and Hot Beverage Service

The Ekoroll Lid-Free Hot Cup is designed for hot beverage applications where service efficiency, secure handling and packaging differentiation are important.

The integrated closure helps simplify preparation by reducing the need for a separate plastic lid. This can support faster workflows in cafés, onboard service, hotel breakfast operations, catering and takeaway beverage programs.

### AVAILABLE STRUCTURES

- Single wall or double wall options depending on application
- White or natural kraft paperboard options depending on project
- Coating options reviewed based on beverage type and compliance requirements

### TYPICAL USE CASES

- Coffee and tea service
- Airline and transportation beverage service
- Hotels and hospitality
- Cafés and coffee chains
- Office catering and events
- Premium takeaway beverage concepts

Performance and compliance documentation can be provided based on the final product specification and confirmed production route.

## LID-FREE COLD CUP

### Integrated Paper Closure for Cold Beverage Concepts

The Ekoroll Lid-Free Cold Cup is designed for selected cold beverage applications where brands want to reduce separate lid handling while offering a distinctive paper-based service format.

The integrated closure can support cold drink concepts such as juice, iced coffee, soft drinks, events, hospitality and transportation service.

### KEY BENEFITS

- Integrated paper closure
- Reduced need for separate plastic lid handling
- Strong visual differentiation
- Practical for service environments with repeated beverage preparation
- Suitable for branded customer experience concepts

### TYPICAL USE CASES

- Iced coffee
- Juice and soft drinks
- Airline economy service
- Events and festivals
- Quick-service restaurants
- Hospitality and catering

Cold drink suitability depends on beverage type, ice use, holding time, coating structure and final product specification.

# BEVERAGE SYSTEMS OVERVIEW

Ekoroll supports a broad range of paper-based beverage packaging solutions, from standard paper cups to integrated lid-free cup systems and custom beverage service concepts.

This allows customers to build a complete beverage packaging program based on product type, service model, sustainability goals and brand positioning.

- PRODUCT CATEGORIES

# STANDARD PAPER CUPS & LIDS

# PREMIUM FOIL PAPER CUPS

DESIGNED FOR BRANDS THAT WANT PACKAGING  
TO BE PART OF THE EXPERIENCE.

Designed for brands that want their beverage packaging to feel elevated, Ekoroll Premium Foil Paper Cups combine reliable paper cup performance with a refined metallic inner finish.

The black exterior creates a clean, modern appearance, while the metallic foil interior adds a distinctive visual effect that elevates coffee, tea, specialty drinks, desserts and promotional beverage concepts.

A paper cup can be more  
than a container.  
It can become part of the  
brand moment. ”

**Note:** Premium Foil cups include a metallic foil lining, part of Ekoroll's premium/branding range, not the compostable paper range.

IDEAL FOR  
PREMIUM BEVERAGE CONCEPTS

This range is ideal for cafés, hotels, events, seasonal campaigns, premium takeaway programs and brand launches where packaging plays an important role in customer perception.

## PRODUCT PORTFOLIO

### RETAIL & FMCG PACKAGING

### PERAKENDE & FMCG AMBALAJ ÇÖZÜMLERİ

Smart retail packaging systems developed to enhance shelf impact, protect product integrity, and support sustainable brand positioning across fast-moving consumer markets.

Product Range Includes:

- Kraft Stand-Up Pouches
- Window Paper Tubes
- Eco-Friendly Folding Boxes
- Oil-Resistant Paper Bags
- Custom Printed Retail Packaging

Available in multiple sizes, structures, and branding options.

**Designed for Shelf Impact. Built for Brand Growth.**

# ÜRÜNLER

## PRODUCT PORTFOLIO

### SUSTAINABLE LIFESTYLE PRODUCTS

### SÜRDÜRÜLEBİLİR YAŞAM ÜRÜNLERİ

Eco-conscious product solutions crafted to support sustainable living, combining natural materials, biodegradable alternatives, and responsible production standards.

Product Range Includes:

- Biodegradable Accessories
- Bamboo Products
- Corn Fiber Applications
- Natural Incense Collection
- Private Label Lifestyle Solutions

Available in multiple sizes, structures, and branding options.

**Sustainable by Nature. Responsible by Design.**

# ÜRÜNLER

## PRODUCT PORTFOLIO

### SMART RETAIL PACKAGING

#### AKILLI PERAKENDE AMBALAJ

Performance-driven retail packaging engineered for shelf impact, product protection and brand differentiation across fast-moving consumer markets.

Product Range Includes:

- Smart & Recyclable Plastics
- Hybrid Packaging Systems
- Barrier & Protective Structures
- Performance-Driven Material Development
- Custom R&D Solutions

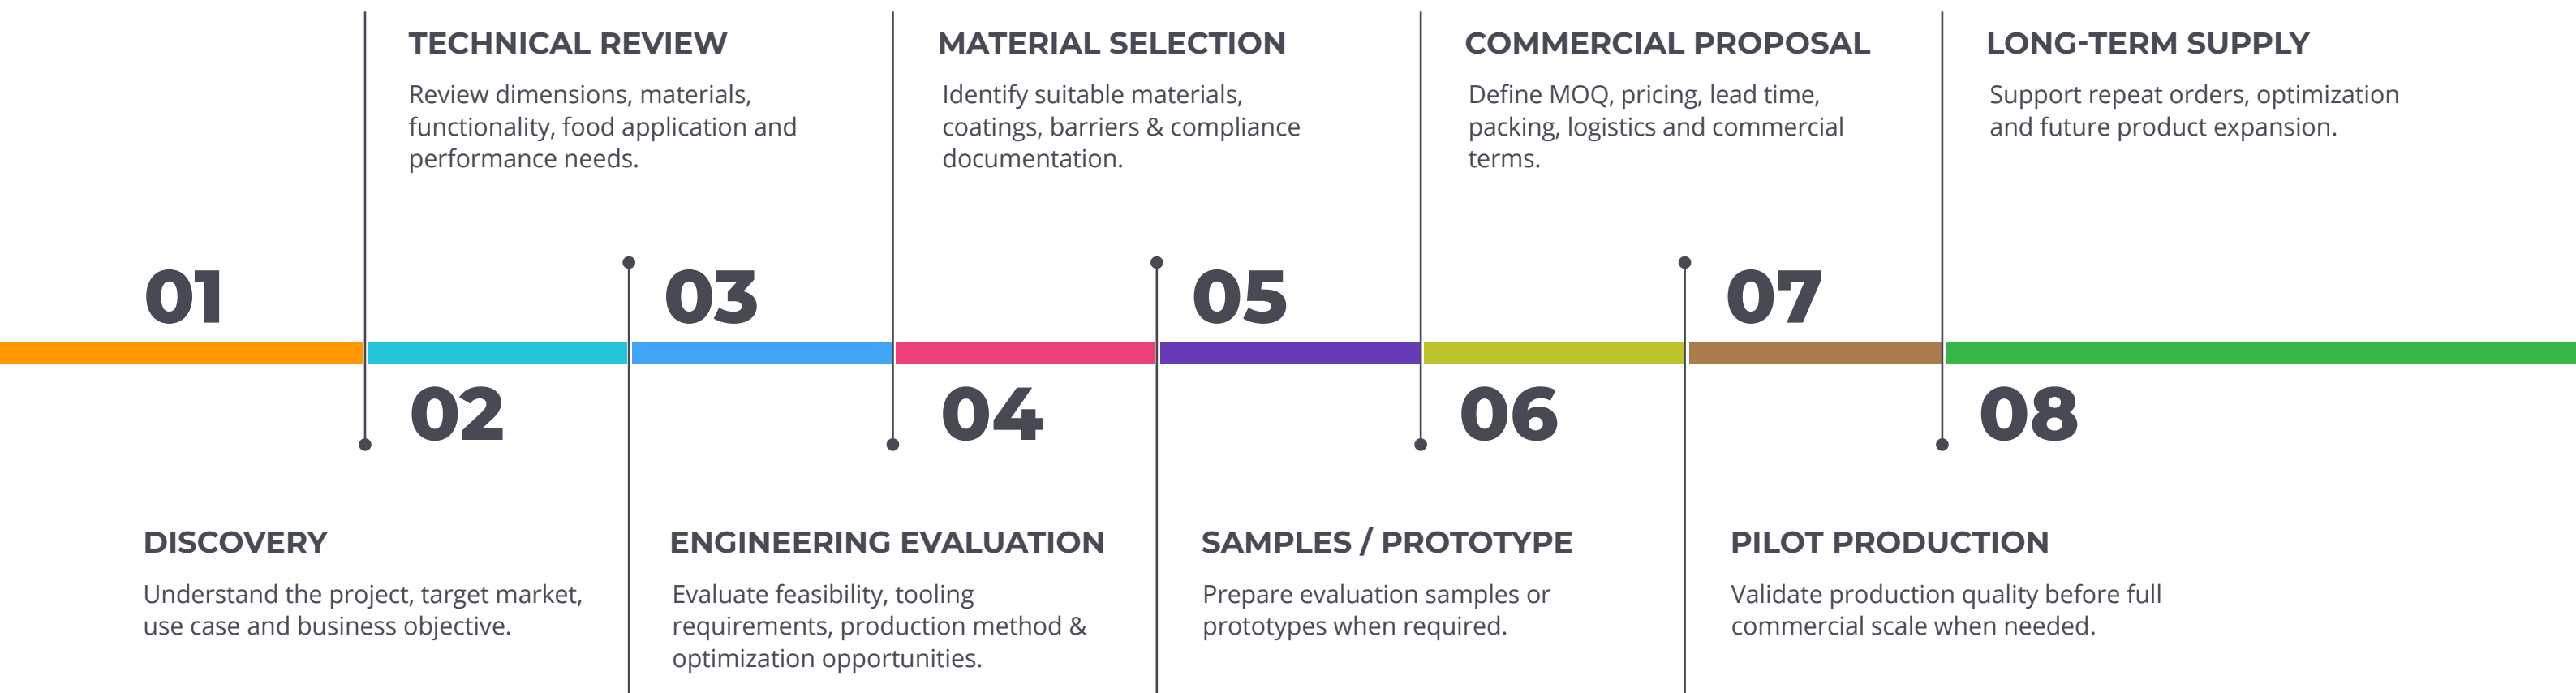

A separate commercial line for high-barrier retail applications. Our plastic-free commitment applies to the fiber-based eco range.

**Material Intelligence. Performance Delivered.**

# HOW WE DEVELOP PACKAGING

Every project follows a structured development process designed to reduce technical risk and improve production efficiency:

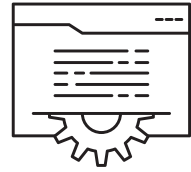

“Successful packaging is created through collaboration, technical understanding and disciplined execution.”

This process helps customers move from concept to commercial production with confidence. It also helps partners communicate clearly with end customers, especially when evaluating new or customized packaging solutions.

# WHY PARTNER WITH EKOROLL

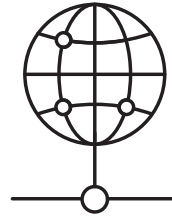

## Manufacturing Strength. Global Vision.

Scalable manufacturing systems built for global supply, regulatory alignment, and long-term commercial stability.

### PRODUCTION CAPABILITY

Advanced converting & forming lines  
Flexible MOQ for wholesale partners  
High-volume container-ready production  
Custom tooling & mold development

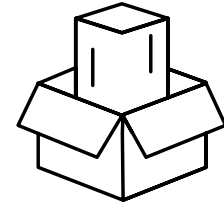

### EXPORT & PRIVATE LABEL EXPERTISE

Multilingual packaging capability  
EU & Middle East export experience  
OEM / ODM support  
Fast sampling & development cycles

### SUSTAINABILITY COMMITMENT

FSC-ready materials  
Compostable & biodegradable options  
Plastic-reduction engineering  
EU market compliance mindset

### OPERATIONAL RELIABILITY

Quality control checkpoints  
Structured supply chain  
Stable raw material sourcing  
Long-term partnership approach

Yılların Deneyimi

## TR NEDEN EKOROLL

Yüksek hacimli üretim kapasitesi, özel kalıp geliştirme, private label desteği ve ihracata hazır sistemleri ile global iş ortaklarına güvenilir ambalaj çözümleri sunar.

- Esnek MOQ ve yüksek üretim kapasitesi
- Sürdürülebilir ve çevre dostu malzeme seçenekleri
- OEM / ODM ve private label üretim
- Uluslararası ihracat deneyimi
- Güçlü kalite kontrol ve operasyonel yapı

Ölçek için tasarlandı. Sorumlulukla üretildi.

## Typical Partner Scenarios

A distributor wants to expand its sustainable packaging portfolio with differentiated products.

A brand owner needs custom packaging but requires technical filtering before committing to tooling or mass production.

A foodservice company wants to reduce plastic without disrupting operations or customer experience.

A consultant, agent or market partner needs a reliable packaging development partner behind customer discussions.

A retailer or hospitality group needs private label packaging with practical production and documentation support.

# SUSTAINABILITY & COMPLIANCE

Responsible Today. Ready for Tomorrow.

Ekoroll integrates environmental responsibility with regulatory awareness, developing packaging systems aligned with evolving European market expectations. Our approach goes beyond materials — it is embedded in design, sourcing, production, and long-term innovation strategy.

## CERTIFIED & COMPLIANT

|                  |                                                        |
|------------------|--------------------------------------------------------|
| DIN-Geprüft Home | Home-compostable certified (DIN CERTCO / NF T51-800)   |
| EN 13432         | Industrially compostable materials (European standard) |
| PFAS-Free        | Food-safe coatings, no added PFAS                      |
| BPA-Free         | No bisphenol-A in food-contact layers                  |
| EU Food-Contact  | Compliant with EU food-contact regulations             |
| FSC-Ready        | Responsibly sourced fiber (upon request)               |

## EU COMPLIANCE AWARENESS

We closely monitor European regulatory developments to ensure our solutions remain aligned with market expectations.

- Awareness of EU packaging and environmental directives
- Material selection aligned with sustainability trends
- Adaptable product structures for evolving compliance needs
- Documentation-ready export systems

## FSC & RESPONSIBLE SOURCING

Responsible sourcing is central to our material strategy.

- Fiber-based and renewable material focus
- FSC-ready material options (upon request)
- Supplier evaluation and controlled sourcing processes
- Commitment to reducing environmental impact across supply chains

## PLASTIC REDUCTION STRATEGY

We actively develop alternatives that reduce dependency on traditional plastics.

- Molded fiber & paper-based applications
- Hybrid packaging structures for optimized material use
- Lightweight design engineering
- Transition support from plastic to fiber-based solutions

## FUTURE-READY MATERIAL INNOVATION

Innovation is driven by long-term sustainability and performance balance.

- Continuous R&D in alternative materials
- Barrier improvement for fiber applications
- Performance-driven material testing
- Adaptation to next-generation packaging demands

# TR SÜRDÜRÜLEBİLİRLİK & UYUM

Ekoroll, çevresel sorumluluğu mevzuat farkındalığı ile birleştirerek Avrupa pazarının değişen beklentilerine uyumlu ambalaj sistemleri geliştirir.

Yaklaşımımız yalnızca malzeme seçimiyle sınırlı değildir; tasarım, tedarik, üretim ve uzun vadeli inovasyon stratejisine entegredir.

## Sustainability as Strategy. Aligned with European Standards.

Sürdürülebilirlik Bir Stratejidir.  
Avrupa Standartlarıyla Uyumlu.

# CUSTOMIZATION & DEVELOPMENT PROCESS

**Structured. Transparent. Scalable.**

At Ekoroll, every project follows a clearly defined workflow designed to ensure technical precision, regulatory alignment, and reliable production execution for international partners.

## CONSULTATION & TECHNICAL ALIGNMENT

- Product application analysis
- Target market & compliance discussion
- Volume forecasting & logistics planning
- Material & structure recommendation
- Private label feasibility review

## DESIGN & SAMPLING

- Structural engineering
- Material optimization
- Prototype development
- Functional & durability testing
- Sample validation & approval

Fast-track sampling available for export projects.

## PRODUCTION & QUALITY ASSURANCE

- Scheduled production planning
- Multi-stage quality control
- Raw material traceability
- Compliance-aware documentation
- Container load optimization

## EXPORT & DELIVERY COORDINATION

- Export-ready packaging
- Incoterms flexibility
- Shipping documentation support
- Containerized logistics execution
- Long-term supply continuity planning

## TR ÖZEL ÜRETİM SÜRECİ

Ekoroll'de her proje, teknik doğruluk, mevzuat uyumu ve planlı üretim prensipleri doğrultusunda yapılandırılmış bir süreç ile yürütülür. İlk aşamada ürün uygulaması, hedef pazar ve lojistik gereklilikler analiz edilir; ardından tasarım, numune ve performans testleri tamamlanarak onay sürecine geçilir. Onay sonrası üretim planlaması, kalite kontrol adımları ve dokümantasyon hazırlıkları titizlikle gerçekleştirilir. Sürecin son aşamasında ise ihracat koordinasyonu ve konteyner bazlı sevkiyat planlaması ile projeler uluslararası teslimata hazır hale getirilir. Amacımız, her iş ortaklığına şeffaf, ölçeklenebilir ve uzun vadeli bir üretim altyapısı sunmaktır.

**From Planning to Production.  
From Production to Partnership.**

Planlamadan Üretime.  
Üretimden İş Ortaklığına.
