Integrated Cup Systems,
Paper Food Containers & Custom
Sustainable Packaging

ABOUT EKOROLL

ENGINEERING BETTER PACKAGING SYSTEMS

Ekoroll Packaging Solutions develops and supplies sustainable packaging solutions for modern foodservice and hospitality markets.

Rather than treating packaging as a single product, we approach it as a system that must work across material selection, production feasibility, logistics, service workflow, customer experience and commercial scalability.

Our work combines product development, OEM and private label support, international production coordination, sample evaluation and commercial project management.

PAPER-BASED PACKAGING

FOR A CHANGING FOODSERVICE MARKET

Foodservice packaging is no longer just a disposable item. It has become part of the customer experience, operational workflow, brand presentation and sustainability strategy.

Ekoroll Packaging Solutions supports foodservice brands, distributors, hospitality operators, retailers and packaging partners with practical paper-based packaging systems designed for real commercial use.

Our portfolio includes integrated cup systems, paper cups, paper food containers, bowls, trays, lids, dessert packaging and custom packaging concepts developed for takeaway, delivery, catering, retail and high-volume service environments.

“ We help partners move from product idea to sample evaluation, technical review and scalable commercial supply. ”

BEYOND MATERIAL SUBSTITUTION

Replacing plastic is only one part of the packaging challenge. A successful packaging solution must still perform, protect the food, support service efficiency, meet customer expectations and remain commercially practical.

Ekoroll focuses on packaging systems that balance sustainability with real operational performance.

Our paper-based packaging portfolio supports brands and operators looking for practical alternatives to conventional plastic-heavy formats while maintaining the usability required in foodservice, takeaway and retail environments.

EKOROLL LID-FREE CUP™ SYSTEM

Foldable / Home Compostable / Plastic Free

DESIGNED TO REDUCE SEPARATE PLASTIC LID HANDLING

The Ekoroll Lid-Free Cup System is an integrated paper cup concept designed to simplify beverage service and reduce reliance on separate plastic lids.

Instead of using a separate lid, the cup structure includes an integrated folding paper closure. This creates a more streamlined beverage service experience for selected hot and cold drink applications.

The system is especially relevant for environments where speed, handling, storage, waste reduction and service flow matter.

KEY ADVANTAGES

Integrated Paper Closure: The closure is built into the cup structure.

No Separate Lid Handling: Helps reduce the need to stock, handle and serve separate plastic lids.

Operational Simplicity: Designed to support faster preparation and cleaner service flow.

Differentiated Customer Experience: Creates a distinctive packaging format for modern beverage service.

Suitable Applications: Cafés, hospitality, airline service, events, takeaway, catering and high-volume beverage operations.

LID-FREE HOT CUP

Designed for Coffee, Tea and Hot Beverage Service

The Ekoroll Lid-Free Hot Cup is designed for hot beverage applications where service efficiency, secure handling and packaging differentiation are important.

The integrated closure helps simplify preparation by reducing the need for a separate plastic lid. This can support faster workflows in cafés, onboard service, hotel breakfast operations, catering and takeaway beverage programs.

AVAILABLE STRUCTURES

- Single wall or double wall options depending on application
- White or natural kraft paperboard options depending on project
- Coating options reviewed based on beverage type and compliance requirements

TYPICAL USE CASES

- Coffee and tea service
- Airline and transportation beverage service
- Hotels and hospitality
- Cafés and coffee chains
- Office catering and events
- Premium takeaway beverage concepts

Performance and compliance documentation can be provided based on the final product specification and confirmed production route.

LID-FREE COLD CUP

Integrated Paper Closure for Cold Beverage Concepts

The Ekoroll Lid-Free Cold Cup is designed for selected cold beverage applications where brands want to reduce separate lid handling while offering a distinctive paper-based service format.

The integrated closure can support cold drink concepts such as juice, iced coffee, soft drinks, events, hospitality and transportation service.

KEY BENEFITS

- Integrated paper closure
- Reduced need for separate plastic lid handling
- Strong visual differentiation
- Practical for service environments with repeated beverage preparation
- Suitable for branded customer experience concepts

TYPICAL USE CASES

- Iced coffee
- Juice and soft drinks
- Airline economy service
- Events and festivals
- Quick-service restaurants
- Hospitality and catering

Cold drink suitability depends on beverage type, ice use, holding time, coating structure and final product specification.

BEVERAGE SYSTEMS OVERVIEW

Ekoroll supports a broad range of paper-based beverage packaging solutions, from standard paper cups to integrated lid-free cup systems and custom beverage service concepts.

This allows customers to build a complete beverage packaging program based on product type, service model, sustainability goals and brand positioning.

PRODUCT CATEGORIES

- Integrated Lid-Free Cups

For hot and cold beverage service concepts requiring differentiation and reduced lid handling.
- Single Wall Cups

For standard hot and cold drink service.
- Double Wall Cups

For improved hand comfort in hot beverage applications.
- Ripple Paper Cups

For premium hot drink presentation, improved grip and hand comfort.
- Specialty & Premium Cups

Window, embossed and foil-lined cups for branded, premium presentation.
- Vending Cups

For automated beverage machines and institutional service.
- Paper Cup Lids & Accessories

Paper, CPLA or other lid options depending on product specification and project requirements.

STANDARD PAPER CUPS & LIDS

PREMIUM FOIL PAPER CUPS

DESIGNED FOR BRANDS THAT WANT PACKAGING
TO BE PART OF THE EXPERIENCE.

Designed for brands that want their beverage packaging to feel elevated, Ekoroll Premium Foil Paper Cups combine reliable paper cup performance with a refined metallic inner finish.

The black exterior creates a clean, modern appearance, while the metallic foil interior adds a distinctive visual effect that elevates coffee, tea, specialty drinks, desserts and promotional beverage concepts.

A paper cup can be more
than a container.
It can become part of the
brand moment. ”

Note: Premium Foil cups include a metallic foil lining, part of Ekoroll's premium/branding range, not the compostable paper range.

IDEAL FOR
PREMIUM BEVERAGE CONCEPTS

This range is ideal for cafés, hotels, events, seasonal campaigns, premium takeaway programs and brand launches where packaging plays an important role in customer perception.

CUSTOM PRINTING & BRAND PRESENTATION

Packaging is one of the most visible parts of the customer experience. Ekoroll supports custom printing and branded packaging programs for companies that want to create stronger shelf presence, customer recognition and brand consistency.

CUSTOM OPTIONS MAY INCLUDE

- Full-color printing
- Single-color printing
- Kraft or white paperboard presentation
- Custom artwork coordination
- Branded sleeves
- Custom tags or labels
- Private label packaging
- Retail-ready packaging formats
- Distributor-ready cartons

ARTWORK SUPPORT

Ekoroll can support customers with dieline coordination, artwork review and production preparation to help reduce errors before mass production.

Custom printing feasibility, MOQ, setup cost and lead time depend on product type, artwork, material structure and order quantity.

HOW TO REQUEST A QUOTATION

To prepare an accurate quotation, please share the following details:

1. Product category or reference image
2. Required size, capacity or dimensions
3. Food or beverage application
4. Required quantity per item
5. Destination country, city or port
6. 20FT, 40HQ, LCL or sample requirement
7. Plain or custom printed packaging
8. Required material or sustainability preference
9. Required certificates or compliance documentation
10. Target timeline and launch date

Send us your product list and estimated volume. Our team will prepare the most suitable commercial proposal for your project.

Certification documentation is available depending on final product specification and production route.
